ELYTHRA EDUFYI TECH SOLUTIONS PVT LTD

IT, CYBERSECURITY & AI USAGE POLICY

For Employees, Interns and Consultants Using Personal Devices

Registered Office	Third Floor, 7 Hills, #424, 10th Cross, 27th Main, Sector 1, HSR Layout, Bengaluru, Karnataka 560102
CIN	U85500KA2024PTC194436
Email / Website	edufyi@edufyitechsolutions.in | www.edufyitechsolutions.com
Effective Date	28/09/2026

This Policy establishes minimum security and responsible-use requirements for Company systems, personal devices used for Company work, software development environments and AI tools.

1. Purpose

The Policy protects Company systems, source code, customer and student information, intellectual property, credentials and AI/software projects while enabling approved use of technology.

2. Personal Laptop / BYOD Requirements

- Use a password or passcode and automatic screen lock.
- Keep the operating system, browser and security software reasonably updated.
- Use device encryption where supported and appropriate.
- Do not permit unauthorized persons to access Company work or accounts.
- Do not install suspicious or pirated software on a device used for Company work.
- Separate Company work from personal accounts where reasonably practicable.
- Report loss, theft or compromise of a device that contains or can access Company information promptly.

3. Account and Credential Security

- Use unique, strong passwords and multi-factor authentication where available.
- Never share passwords, API keys, tokens or access credentials.
- Do not store secrets in public repositories or source code.
- Use Company-approved password/secret-management methods where provided.
- Access only the systems and data required for assigned duties.

4. Source Code and Repository Rules

- Use Company-approved repositories for Company source code.
- Do not push Company code to personal or public repositories without written approval.
- Do not expose credentials, secrets, private keys or customer data in commits.
- Do not download or copy repositories unnecessarily.
- Follow approved branch, review and deployment procedures where applicable.

5. AI Tool Usage

Employees, interns and consultants may use approved AI tools for legitimate Company work. However, AI usage must not compromise Company confidentiality, security, intellectual property or customer/student data.

6. Information That Must Not Be Entered Into External AI Tools

- Passwords, API keys, access tokens, private keys or other secrets.
- Customer, student or employee personal data unless specifically approved and appropriately protected.
- Confidential client documents or contracts unless authorized.
- Unreleased source code or proprietary algorithms unless the tool and workflow are specifically approved.
- Unreleased product roadmaps, investor/funding information or sensitive commercial information.
- Internal HR, financial or management information unless authorized.

7. AI Review Requirements

- Review AI-generated code before use.
- Check AI outputs for security vulnerabilities, hallucinations and incorrect dependencies.
- Check licensing and third-party material risks before commercial use.
- Do not rely on AI output as a substitute for engineering, legal, security or compliance review where such review is required.
- Do not use AI to make unauthorized decisions about employees, customers or students.

8. Software and Downloads

Only legitimate and appropriately licensed software may be installed for Company work. Pirated software, cracked applications and unauthorized security tools are prohibited.

9. Data Handling

Collect, access, store, transfer and delete Company and personal data only for legitimate business purposes and in accordance with Company policies and applicable law.

10. Email, Messaging and Cloud Storage

Company information must not be forwarded to personal email or uploaded to personal cloud storage unless specifically authorized. Use approved collaboration and storage systems where available.

11. Security Incident Reporting

Report suspected phishing, malware, unauthorized access, lost devices, credential compromise, accidental disclosure, data leakage or other security incidents to the Company promptly. Do not conceal or deliberately delay reporting of a material incident.

12. Monitoring and Security Controls

To the extent permitted by applicable law, the Company may use reasonable technical and administrative controls to protect Company systems and information, including access controls, audit logs, repository controls and security monitoring. The purpose is security, compliance and business protection, not unrestricted surveillance of personal activity.

13. Acceptable Use

Company systems and accounts shall not be used for unlawful activity, unauthorized access, harassment, distribution of malicious software, credential theft, fraud, piracy or other activity that may expose the Company to legal, security or reputational risk.

14. Exit and Access Removal

When an engagement ends, Company access may be revoked. The individual must return Company property and remove unauthorized Company data from personal devices/accounts as required by the NDA and exit procedures.

15. Violations

Violations may result in access restrictions, disciplinary or contractual action and other remedies available under applicable law, depending on the circumstances.

16. Policy Updates

The Company may update this Policy from time to time to address changes in technology, security threats, AI tools, business processes or applicable requirements. Material updates will be communicated through appropriate Company channels.

17. Acknowledgement

By signing the acknowledgement below, the Recipient confirms that they have read and understood this Policy and agree to follow it while using Company systems, information, personal devices or AI tools for Company work.

18. Governing Law

This Policy shall be interpreted subject to applicable Indian law. Subject to applicable law, disputes shall be subject to the competent courts having jurisdiction at Bengaluru, Karnataka.

SIGNATURE & ACKNOWLEDGEMENT
