EDUFYI TECH SOLUTIONS
SALES & PAYMENT POLICY

1. Purpose
This policy establishes mandatory standards for student pitching, pricing, registration, GST collection, payment processing, sales credit, team credit, mis-pitching and discounts.

2. Approved Ticket Price
The standard company ticket/package price starts from ₹4,500. Any amount below the approved ticket price will not be considered as valid sales credit unless authorised in writing before collection.

3. Minimum Registration
Minimum registration amount: ₹1,025 + 18% GST. Applicable GST must be collected from the student. The applicable amount must be clearly communicated before payment.

4. GST Collection
Applicable GST must be collected. Employees must not omit or misrepresent GST or offer unauthorised GST adjustments.

5. Wrong Pitch / Mis-Pitch
If a payment is generated through a materially incorrect or unauthorised pitch, the payment will not be considered for the concerned BDA or team.
Examples include false course, placement, salary, internship or stipend promises; incorrect pricing; unauthorised benefits; and unauthorised refund commitments.

5A. Wrong Pitch / Mis-Pitch – Penalty
If it is found that a BDA has made a materially incorrect pitch, provided false information, or made unauthorised promises to generate a payment, the concerned BDA will be subject to a deduction/penalty as determined by management. Such payments will not be considered for the BDA's sales credit, team revenue, incentives, or performance reporting. This includes false promises regarding placements, salary, stipend, internship, course benefits, pricing, refunds, or any other unauthorised commitment.

6. Incomplete / Missed Pitch
A payment is not automatically valid merely because the student has paid. If required information was materially missed, misrepresented or incorrectly communicated, management may review the transaction before assigning sales credit.

7. Unauthorised Discounts
No BDA, TL or Manager may independently reduce the approved price. Any discount must have prior written authorisation. Unauthorised discounted payments may be excluded from BDA sales, team sales, incentives and performance reporting.

8. Payment Ownership
Sales credit is based on verified company records. Payments may be excluded for wrong pricing, incorrect GST, mis-selling, duplicate payment, refund, cancellation, fake payment proof, incorrect student information or unauthorised commitments.

8A. Default / Failed Payment – Revenue Exclusion
If the payment associated with a particular lead subsequently goes into default, remains unpaid, is cancelled, or otherwise fails to meet the company's verified payment requirements, that lead will not be counted towards revenue. The initial ₹1,000 registration/onboarding amount received against that lead will also not be considered as revenue for sales, incentives, targets, or performance calculations. Revenue credit will be given only after the payment is successfully verified and meets the company's payment requirements.

9. Personal Collection Prohibited

Employees must not collect student payments into personal bank accounts, UPI IDs or wallets.
All payments must follow the company's approved payment process.

10. Payment Verification

Management/Finance/HR may verify payment proof, student information, CRM entries, call recordings, messages, pitch details, registration details and refund/cancellation status.

11. Sales Reporting
All payments must be updated in the designated company system/group/CRM within the prescribed reporting time. Incomplete or delayed reporting may result in exclusion until verification is completed.

12. Team Accountability

BDA: responsible for accurate pitching and payment collection.
TL/Manager: responsible for monitoring team pitching, pricing and payment quality.
Management: responsible for final verification and policy exceptions.
No verbal instruction can override the approved sales policy.

13. Fake Sales / Manipulation
Fake registrations, duplicate payment reporting, fake payment screenshots, self-payments, artificial sales, manipulated CRM records, hiding cancellations/refunds and backdated entries are prohibited.
